S.S.C	G.S.E.B.	MARCH,2020	72.67%

Work Experience

As Laravel Developer:-

At: LivBix Technologies - Ahmedabad, Gujarat

Join: April 2024 to April 2025

- Provided partners with expert-level knowledge to collaboratively solve complex technical problems using PHP and Laravel framework.
- Developed transactional web applications leveraging Laravel and MySQL, incorporating front-end skills in HTML, CSS, JavaScript, jQuery, and Bootstrap.
- Diagnosed, troubleshooted, and resolved issues related to websites, servers, and third-party integrations to ensure smooth application performance.
- Identified and fixed bugs and performance bottlenecks based on testing outcomes and customer feedback.

Projects

➤ **Londonlyf - E-commerce website (LivBix Technologies)**

The client operates LondonLyf.com, an e-commerce platform specializing in clothing retail that enables users to browse and purchase apparel online while managing user accounts and associated data securely. As a Junior Backend Developer, I contributed to developing and maintaining the server-side logic, managing database operations, and ensuring secure, efficient handling of user data and transactions, collaborating closely with the frontend team to optimize overall website performance and functionality.

Project URL - <https://www.londonlyf.com/>

➤ **TPI - Certificate Management System (LivBix Technologies)**

TPI is a Certificate Management System designed to streamline the entire inspection and certification process. It manages inquiries, work orders, equipment, certificates, certificate templates, users, roles, and permissions. As a Junior Backend Developer, I worked on the system workflow starting from creating an inquiry, converting it into a customer, opening a work order, and initiating inspections. I also developed features to create, upload, and manage certificate templates, as well as generate and download certificates, ensuring smooth backend operations and secure data handling throughout the process.
